

Arjent S2™

AS BRILLIANT
INSIDE AS IT IS OUTSIDE.

MORE BRIGHT new thinking from Federal Signal
Introducing ultra bright white LED Takedown lights!

- New bright white LED flashing or steady burn takedown lights.
- Elliptical shape provides for continuous 360 degree light coverage.
- ROC technology that eliminates 85% of potential failure points found within typical competitive lightbars.
- Solaris reflective technology that delivers the BRIGHTEST, most efficient warning light output available.

Use the online configurator at <http://www.fedsig.com/products/config> to order your next Arjent S2 lightbar with LED takedowns. Halogen takedowns are still available.

The Arjent S2 Advantage:

- Microprocessor controlled electronics and software for more reliable performance.
- Fastest/easiest install with only power, ground, and a RJ 485 bus connection.
- Program and clone the entire fleet using the Epic™ programmer and laptop or PC.
