

LEGEND

AS BRILLIANT
INSIDE AS IT IS OUTSIDE.

MORE BRIGHT new thinking from Federal Signal
Introducing ultra bright white LED Takedown lights!

- Now you can have the brightness of halogens with Federal Signal's patent pending Solaris high performance LED takedowns.
- New Solaris reflector design provides focused lighting for increased officer safety and protection.
- LEDs reduce the current draw, freeing up amperage for other essential vehicle equipment.
- LEDs generate less heat than halogens and have a longer life, which means reduced downtime and replacement costs.

Use the online configurator at <http://www.fedsig.com/products/config> to order your next Legend lightbar with LED takedowns. Halogen takedowns are still available.

Other new features now offered with the Legend:

- Stop/Tail/Turn option may be ordered on 45" and 53" Legends.
- Save time and money when installing your fleet; Clone and duplicate patterns and other pre-programmed options such as front/rear cut-off, intersection warning and dimming from vehicle to vehicle with the new Epic™ programmer and a laptop or PC.
