

# FIREBALL® COMPACT STROBE BEACON

available in: 

## > Features

- Powerful strobe flash in a compact package-perfect for difficult mounting applications.
- Each unit is multi-volt (12/24V).
- Metal base and polycarbonate dome for durability.
- Self-contained power supply.
- Permanent or magnetic mount.

Federal Signal's FireBall® strobe light is one of the most compact, high-power strobes available. Although it is less than 5 inches high, it produces an effective flash as powerful as strobes much larger in size. Its size enables the FireBall strobe to be mounted in a wide variety of applications.

### Designed for Durability

The FireBall strobe has an integral, self-contained power supply. All exposed components are corrosion resistant. The FireBall also features an impact-resistant polycarbonate dome, die cast base, and a stainless steel retaining ring.

These units produce 75 double flashes per minute (11 joules per double flash, 150 total per minute).

FireBall strobes are available in permanent or magnetic mount. Magnetic mount units include a swivel bracket for using the FireBall on sloped surfaces.

### Wide Range of Applications

FireBall strobes are ideal for law enforcement, volunteer fire, municipal maintenance, and construction vehicles. The magnetic version is ideal for temporary use, and its compact size makes it easy to store.

## > How to Order

### Specify Model

**600611** 75 double flashes/minute, 12-24V, permanent mount (models include 10' cord and cigarette plug and swivel bracket for using FireBall on sloped surfaces)

**600641** 75 double flashes/minute, 12-24V, magnetic mount

Specify dome color: amber, blue, red, clear, or green.
