

JetSolaris™ Lightbar – now with ROC technology.

The new and improved JetSolaris features the latest in Solaris LED and ROC (Reliable Onboard Circuitry) technology. ROC substantially reduces wiring and connections with its consolidated design of printed circuit boards, and the Solaris LED Reflectors provide maximum LED performance.

Solaris LED and ROC technology improves the performance and virtually eliminates any maintenance while being supported by a five year warranty on the LED components.

The JetSolaris is an LED lightbar that can be used in a variety of applications for Fire/Rescue, Police, DOT and Tow/Recovery. You can now build your own models by using the Federal Signal on-line Lightbar Configurator at www.fedsig.com/products/config/

Features

- > Five-year warranty on Solaris LED components
- > Innovative ROC board technology
- > Variety of unique flash patterns
- > LEDs available in Red, Blue, Amber, White, and Green
- > Halogen work light options are available
- > NFPA Compliant models are available

Updated Model Numbers

There are two methods for ordering the new JetSolaris. You may order the preselect new models listed above or design a ROC custom configuration with Federal Signal's on-line Lightbar Configurator* at www.fedsig.com/products/config/

*When using Federal Signal's lightbar configurator, a customer support representative will provide you a final model number either at your request or upon receipt of a purchase order.

Reduced Price

The new ROC technology not only improves the performance of the JetSolaris but it also allows us to offer it to you at a reduced price. Prices have been reduced as much as 30% less than the recent standard list prices.

If you have any questions regarding this product, please contact your local Federal Signal Representative.
