

Product Enhancement for Arjent® S2 and Arjent SL and Vista® lightbars

Federal Signal is pleased to announce more robust mounting feet for the Vista®, Arjent S2 and Arjent SL lightbars.

Several changes have been made to the mount design for improved mounting of these lightbars to the vehicles. Hook kits are gusseted to improve the strength of the bracket bend. The new mount foot also incorporates a metal strap for enhanced strength and deter it from bending. Lastly, the durometer, or firmness, of the mounting foot pad has been increased to accommodate for the air pressure.
