

Federal Signal introduces the new Vision SLR, non-linear lightbar

Improved safety from every angle, the Vision SLR was designed specifically for departments concerned with officer's safety through intersections. In combination with its unique shape, Vision SLR's "Smart Pods" deliver up to 8 times more light output than a typical linear LED lightbar.

Federal Signal's exclusive technologies are built into the Vision SLR for superior light performance. Visit our website at www.fedsig.com and download the [Vision SLR](#) brochure to see how this non-linear rotating LED lightbar is dramatically increasing light performance and reducing road-way risks.

Exclusive to Federal Signal's Vision SLR:

- **SpectraLux** multicolor LED technology provides the ability for a single light source to change color while in motion. Individual Smart Pods can be programmed to flash between Red, Blue, Amber or White.
- **SLRQ** LED reflector technology for better optical efficiency and superior off-axis warning
- **CONVERGENCE network** compatible for "plug-n-play" installation and programming
- Optional LED **HotFoot**™ mounting for LED Takedowns or Slate™ (ALPR) cameras
- Individual Pod replacement for easy servicing
- Single-color pod LEDs offered in Amber, Blue, Green, Red or White
- Optional LED alley caps
- Available in 46", 53" and 60" lengths
- LED aerial view reflector
