

Federal Signal introduces the new 70" Legend® lightbar.

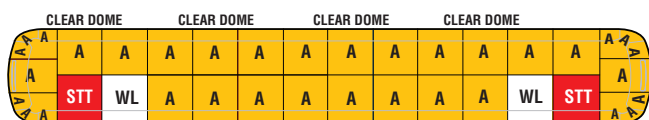

Federal Signal is pleased to announce the introduction of the new 70" Legend® lightbar. This new addition to the Legend line-up offers a low-profile LED lightbar solution for larger vehicular applications. Utilizing Federal Signal's patented Solaris® and ROC (Reliable Onboard Circuitry™) technologies, the 70" Legend provides superior off-axis warning and increased up-time for your fleet.

The 70" Legend is available with a wide-variety of control options to fit your needs. The Legend can be operated by any of Federal Signal's Convergence Network "plug-n-play" controllers like the 6-Button or it can be operated with an interface module. The 6-Button Wireless controller can also be used along with the 70" Legend where the only wiring required for installation is simple power and ground to the controller and the lightbar which saves valuable time and money on installation.

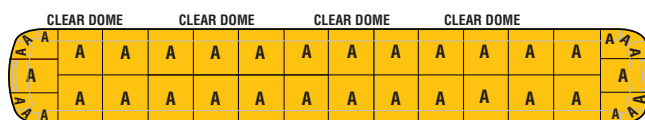

Additional features:

- LEDs offered in Amber, Blue, Green, Red and White
- Dome colors are offered in Amber, Blue, Clear and Red
- LED S/T/T (stop/turn/tail) available
- LED or halogen takedowns lights are available
- Optional built-in SignalMaster directional warning
- Five-year LED warranty
- Configure your custom 70" Legend today on Federal Signal's on-line configurator at www.fedsig.com or choose from the selection of popular pre-configured models below.
