

A Whole New Vision for Improved Safety and Effectiveness

*Federal Signal is pleased to announce Vision SLR
with NFPA models for Fire/EMS applications*

The unique, non-linear shape of the Vision SLR is combined with the superior output of the Solaris LED Rotator to provide improved safety from every angle. In fact, the Vision SLR lightbar provides up to 8 times more light at critical intersection warning angles than a traditional linear lightbar.

SpectraLux™ multi-color LED technology also allows for multiple colors in a single pod. The result, no dead spots for white light cut-off. Instead, the pods change color allowing for full 360-degree coverage in all modes of operation.

Exclusive to Federal Signal's Vision SLR:

- **SpectraLux** multicolor LED technology provides the ability for a single light source to change color while in motion.
- **SLR** LED reflector technology for better optical efficiency and superior off-axis warning.
- **CONVERGENCE network** compatible for "plug-n-play" and programming
- NFPA compliant models
- Individual Pod replacement for easy servicing
- Single-color pod LEDs offered in Amber, Blue, Green, Red or White
- Available in 46", 53" and 60" lengths
- LED aerial view reflector
