

STINGER XL

The Stinger XL is a compact, lightweight, easy-to-use tire deflating device that is extremely effective in stopping pursuits involving large vehicles including large trucks, farm vehicles, and military-type vehicles.

Sturdy, Reusable System:

The Stinger XL consists of a reusable modular base with molded sections of Dupont Zytel® Flexible Nylon® connected with stainless steel hardware. This nylon and stainless steel base is designed to last for numerous pursuits and has withstood impacts in excess of 130 MPH. If damaged, individual sections are easily replaceable.

Superior Spike Penetration:

Stinger spikes are hollow. This allows air to escape at a controlled rate without causing a blowout or sudden loss of control.

The spikes are 2.1" in length and are made of 304-T7 stainless steel. The XL's new 2.1" length spike acts in conjunction with our patented rock-and-tilt mechanism base. This Stinger technology effectively penetrates thicker tires to safely and quickly end pursuits involving many larger vehicles including large trucks, farm vehicles, and military-type vehicles.

Other Features:

The XL's 15½' wide system covers multiple traffic lanes and is furnished with replacement spikes, safety guards, and a spike replacement tool in a compact, quick-deployment carrying case. Additional Stinger replacement spikes are furnished free of charge.

For incredible pursuit stopping power, call your local Stinger Representative. To locate the representative nearest you, call (800)-STINGER.

Dimensions:

Deployed

186" L x 14" W x 2.6" H

Carrying Case

20" W x 18" D x 3¼" H

Shipping Weight:

15.0 lbs - 6.8 kg
