

## Obsolescence of VISTA® Lightbars

Due to declining demand, Federal Signal's VISTA lightbar family will be discontinued. This includes all halogen, strobe, and LED versions of the VISTA product line.

### Timing

Currently, VISTA lightbars are available in 36-inch, 44-inch, 53-inch, 62-inch, and 71-inch lengths.

Effective immediately, all 62-inch and 71-inch models are no longer available.

Federal Signal will discontinue the 36-inch, 44-inch, and 53-inch models at the end of 2009. As a result, new orders for these lengths will be accepted until November 30, 2009. All new orders must be for delivery prior to December 31, 2009.

### Exception

A limited number of pre-select VISTA models will continue to be available after 2009, in order to meet the requirements of various end-user contracts.

### Recommended Alternative

Federal Signal continues to offer a wide variety of lightbar options. Suitable alternatives to the VISTA would include both halogen and LED lightbar styles. If you are interested in a halogen lightbar, Federal Signal continues to offer halogen technology in our AeroDync, Jet, and V-shaped (Vision/Vector/ViewPoint) lightbar families. Suitable LED lightbars for your consideration would include the Legend, Raydian S2, Arjent S2, JLX, and ADX lightbar families.

### Replacement Parts

Even though new VISTA lightbars will no longer be available, Federal Signal will continue to offer a variety of common replacement parts in order to service existing VISTA models currently in service.
