- SAE J595 Class 1 (Amber, Blue, Red, White)
- SAE J845 Class 1 (Amber, Blue, Red, White)
- CCR Title 13 (Amber, Blue, Red)
- IP65

FS TECHNOLOGIES

Built for Versatility and Performance

Federal Signal's 21" Allegiant® is a low-profile, dual-color, mini-light bar solution that provides a superior warning signal for police applications. For example, this mini-light bar can be used as a primary warning device on off-road vehicles used for security and patrol or as wing lights on law enforcement vans.

Packed with Technology to Keep You Safe

Through the Federal Signal Solaris LED reflector technology, the 21" Allegiant mini-light bar is engineered to significantly increase off-axis warning and maximize the LED light source to eliminate dark spots and increase visibility while on the road. In addition, the patented ROC (Reliable Onboard Circuitry) technology is built to minimize potential failure points in the light bar. Wires, connectors, and assemblies have been replaced by PCB assemblies—reducing labor repair time and increasing the road time for vehicles.

Features Made for the Job

The 21" Allegiant can be configured specifically to fit your needs. It comes equipped with (28) high-performing selectable flash patterns and a low-power mode. The 21" Allegiant offers optional takedowns and work lights. Additionally, the 21" Allegiant light bar features an exclusive bed light option, which shines a steady work light down from the light bar onto the bed of the truck for added operator visibility.

SpectraLux® Lights the Way

Exclusive to Federal Signal, the Spectralux multi-color LED technology provides the ability for a LED light source to change color while in operation. In each module of the light bar, through user selected flash patterns, the LEDs can change between Amber, Blue, Red, and White (up to two in each module).
