

On Scene Sync Module

INTRODUCING THE NEW, ON SCENE SYNC MODULE

The new Federal Signal On Scene Sync Module is now available and works in conjunction with any Pathfinder® Siren to provide synchronization between multiple “like-programmed” vehicles.

Federal Signal’s On Scene Sync Module uses a GPS signal to maintain timing between vehicles, providing the capability to synchronize warning lights and voice messages in order to unify the visual and audible warning of multi-vehicle response. An ambient light sensor is also included in the On Scene Sync Module to auto adjust warning lights.
