New XStream™ Brackets and Accessories are Now Available

Federal Signal is expanding XStream™ Accessories and Kits by offering new visor mount kits and optional gasket to further increase the versatility and improve any potential flashback of these interior mount warning lights.

XStream visor mount kits can be used to mount (1) single or dual head XStream light and (2) cameras (forward and rear facing). These kits are vehicle specific and are available for the Dodge Charger 2011-2019, Ford Police Interceptor Utility 2011-2019, and Chevrolet Tahoe 2015-2019.

Dodge Charger

Ford Police Interceptor Utility

Chevrolet Tahoe

Rubber gasket is now available as an optional accessory for the single and dual head XStream models. Simply slide the gasket over the plastic housing of the XStream and cut it to the desired length.

The gasket provides a solution to any flashback that may occur by improving the tight fit of XStream against the windshield and other angled surfaces of the vehicle.
