Introducing the New Pathfinder® Siren with 17 Button Controller

Pathfinder® is a compact, programmable siren and light controller now available with a 17 button, surface mount control head. With a similar look and feel to Federal Signal's SmartSiren Platinum controller, the new 17 button controller is specifically designed and programmed to work with the Pathfinder Siren. The control head features a four-position progressive slide switch and 17 backlit push-buttons. For convenient visual reference, the control head emulates the selected pattern of the SignalMaster operation.

Additional features include a channel on the back of the controller for a wire harness, a USB port on the amplifier for easy programming and customization, and a bail mount bracket for the siren.

The included noise-canceling microphone uses a RJ11 connector to plug directly into the control head, eliminating the need to run a mic cable back to the amplifier. For increased versatility, the amplifier offers a 1/4" jack microphone plug option (1/4" jack microphone and remote extension kit sold separately).

FEATURES

- 100/200 Watt siren/light controller with PA and noise canceling microphone
- (4)-position progressive slide switch and (17) push-buttons
- Built-in dual tone capability
- Built-in Rumbler® Intersection Clearing capability
- Optional FS Vehicle On-Board Diagnostics Intergation (OBDII)
- Programmable timer feature
- Library of selectable siren tones includes Unitrol and Powercall siren tones
- Horn Ring Transfer and Park Kill
- Backlit LEDs on handheld controller emulate SignalMaster™ directional warning operation
- (7) programmable inputs and (12) programmable solid-state relay outputs
- Convergence Network Configuration Software allows for easy customization of siren and light functions
- (2) Convergence Network ports
- Meets or exceeds SAE, California Title 13 and NFPA requirements
- Five-year warranty
