

Switch Controls

Accessories

FEATURES

- Lighting control of up to seven functions
- Easy installation
- Fused circuitry
- Backlit legends for function identification
- 12 Vdc
- Three-year warranty

Federal Signal offers a family of switch control models to activate a variety of lighting functions ranging from one rocker or toggle switch to four rocker switches with 3-position slide switch.

Model SW300-B has (6) lighted single-pole, single-throw (SPST) rocker switches to control virtually any type of lighting function. Switch 1 comes prewired to a 40 A relay and self-setting circuit breaker. Switches 2-6 have 20 A capacity and are fused on a 20 A circuit. These five automotive blade-type fuses are mounted on the back of the switch control housing and correspond to the switches they control. This makes it easy to find any blown fuses for replacement.

Model SW200-B offers the same quality and features as the SW300-B with (4) SPST rocker switches. Switch 1 has 40 A capacity and switches 2-4 have 20 A capacity.

Model SW400SS-B provides switching for (7) separate lighting and auxiliary functions including (4) SPST rocker switches and a 3-position slide switch.

Models SW200-B, SW300-B, and SW400SS-B come with a variety of easy-to-install plastic legends to customize the switch box. These legends are backlit for easy nighttime viewing and function identification. These switch boxes are designed to be installed on a vehicle mounting surface with a bail mounting bracket, which is included.

For users requiring fewer functions, also offered are switch panels that can be mounted flush to the dashboard. Model SW30 has (3) 20 A toggle switches on a L-bracket. Models SW1, SW2, and 670132 have one, two, or three SPST rocker switches on an L-bracket

HOW TO ORDER

SWITCH BOXES

SW200-B	4-switch box with bail bracket; (1) 40 A and (3) 20 A fused switches
SW300-B	6-switch box with bail bracket; (1) 40 A and (5) 20 A fused switches
SW400SS-B	4-switch box with bail bracket and slide switch; (SW1) 20 A, (SW2 & SW3) 40 A max, and (4) 20 A fused switches

SWITCH PANELS

SW1	One 20-amp SPST rocker switch panel on L-bracket
SW2	Two 20-amp SPST rocker switch panel on L-bracket
670132	Three 20-amp SPST rocker switch panel on L-bracket

TOGGLE SWITCH MODELS

SW30	Three 20-amp toggle switch panel on L-bracket
210620SSG	One 2-position toggle switch, Black
210633SSG	One 2-position toggle switch, Chrome
210624SSG	Single-hole switch panel for use with 1/2-inch diameter toggle switch

COMMON REPLACEMENT PARTS

Z122385B	Replacement rocker switch for SW1, SW2, or 670132
Z122A175A	Replacement 2-position toggle switch for SW30 or 210620SSG, Black

SW1

670132

SW30
