

## ▶ AL2 | LED Beacon

### FEATURES

- Available with an anodized aluminum base
- Multi-voltage, 12-24 VDC
- High-profile design, with a sturdy polycarbonate dust cover
- Five-year LED warranty

### APPROVALS

- SAE J845, Class 2

#### High-Profile LED Beacon

The Federal Signal AL2 beacon is a classic style beacon that features LED technology. Meeting Class 2 specifications, the AL2 offers an effective warning signal that is ideal for a variety of applications including snow plows, utility trucks and construction vehicles. The LED technology in the AL2 allows for a minimal Amp draw of only 1 Amp which helps reduce the pull on vehicle electrical systems.

#### Built for Durability

The AL2 comes equipped with a polycarbonate dust cover with a gasket that helps minimize dust and snow build up on the beacon. Electronics are encapsulated in a durable steel enclosure using high-temperature range silicone potting compound for dependable operation. Additionally, the AL2 can operate at 12-24 VDC and is available with an anodized aluminum base.

**Specify Model**

211779-02 Amber dome with dust cover, anodized base

**Specifications**

Voltage	12/24 VDC
Amp Draw	1A @ 12.8 VDC
Flash Patterns	1
Approval	Class 2

**Physical Specifications**

Diameter	8.7 in (22.1 cm)
Height	8.3 in (21.0 cm)

**Ship Weight**

Permanent Mount	3.8 lbs (1.7 kg)
