MicroStat® and UniStat® Status Indicator Accessories

A variety of optional equipment is available for the MicroStat® and UniStat® Status Indicators.

MSLBRCKT

Wall mounting the MicroStat or UniStat is simple with this basic bracket.

MSP

Some applications require that the status indicators be raised above the machine surface. Using powder coated steel helps to improve the visibility of the MicroStat or UniStat. Three different lengths are available; they measure 4 inches (MSP-4), 16 inches (MSP-16) and 32 inches (MSP-32).

MSS

Adding sound to the MicroStat is simple with the plug-in Sound Module. The Sound Module produces 83-85 dBA at 10 feet. This compact piezo device replaces the lamp in the top position of any MicroStat. A slotted opaque lens protects the sound module circuit and permits the sound to be heard at maximum levels. Adding the sound module to the MicroStat changes the Type rating from 4X to Type 1. Sound modules are available in 24 Vdc and 120 Vac operating voltages.

MSTB

The MicroStat or UniStat base can be pipe-mounted or surface-mounted. When using the pipe extensions, the tulip base is required for a true surface mount.

FLASHERS

MicroStat flashers are available in 24 Vac/dc and 120 Vac models. They are only needed if the user wants the MicroStat to flash, and each flashes at 75 FPM.
