

## ▶ AirDek | Mounting Platform

### FEATURES

- Provides ability for agency to transfer AirEL characters from one vehicle to another
- Weather-resistant
- Easy installation
- Lightweight, only 18 pounds
- Communication equipment, including GPS and antennae can be easily mounted to AirDek
- Sturdy powder-coated aluminum with steel reinforcement

#### **Bringing Communication and Identification Together.**

The AirDek is an aerodynamic, low profile mounting platform that fits on the roof of SUVs to support identification, antennae and communication equipment.

This sturdy, weatherproof platform allows agencies to easily remove the platform and transfer it to a new SUV when needing to replace the SUV, saving installation time and money. The AirDek is also an ideal solution to mounting AirEL Identification on corrugated roofs.

The AirDek is also available in a low profile version for the Ford Utility vehicle. The low profile version is approximately an inch shorter than the standard Ford Utility AirDek. This design is intended for those that desire to remain undetected and have a minimal appear of an AirDek on the vehicle while still having all the features.
