

Shedding light on the future of airport security and safety.

In today's world, airport security and safety is becoming more complex for both passengers and airport operators. The need for visibility and identification is even more important on and off the tarmac. AirEL airport vehicle illuminated system allows air traffic controllers, ground crews and airport personnel the ability to see their vehicles at all times and provides a reassuring security presence landside.

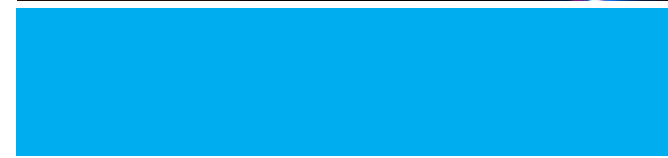

To learn more about AirEL Airport Illuminated Identification, call (800) 264-3578 or visit www.fedsig.com.
