

**SUPPLEMENTAL INSTRUCTION SHEET  
FOR  
LEGEND® LED STOP/TAIL/TURN LIGHT WIRING**

**SAFETY MESSAGE TO INSTALLERS**

People's lives depend on your safe installation of our products. It is important to read, understand, and follow all instructions shipped with the products. In addition, listed below are some other important safety instructions and precautions you should follow:

- To properly install this warning light: you must have a good understanding of automotive electrical procedures and systems, along with proficiency in the installation and use of safety warning equipment.
- This product contains high intensity LED devices. To prevent permanent eye damage, DO NOT stare into light beam at close range.
- File this instruction sheet in a safe place and refer to it when maintaining and/or reinstalling this product.

Failure to follow all safety precautions and instructions may result in property damage, serious injury, or death to you or others.

**A. GENERAL.**

To properly connect a stop/tail/turn light, the installer must have a good understanding of automotive electrical procedures and systems.

The Legend LED Stop/Tail/Turn functionality is designed for operation in Federal Signal Legend lightbars.

**B. INSTALLATION.**

1. Disconnect the vehicle battery.
2. Locate the 3-conductor cable exiting the lightbar which contains the red, black, and green wires.

**NOTE**

If installing in a vehicle that has turn signal lights separate from brake lights, you must purchase a separately available tail light converter.

3. Using figure 1 as a guide, splice the appropriate cables into the vehicle's existing wiring. The input leads require a positive (+) 12VDC signal to activate.

4. Follow the Legend lightbar installation instructions (2562246) to provide power to the lightbar.

5. Reconnect vehicle battery.

6. Test the lightbar. The Stop/Turn/Tail functionality of the lightbar should coincide with the vehicles Stop/Turn/Tail functionality.
