New "Switch-Over" kits for Solaris® ILS and SpectraLux™ ILS

Federal Signal's 8-head Front Split ILS models (**ILSSF** and **SILSS**) are sold with "vehicle-specific" mounts/brackets/shrouds. However, the LED boards used in the ILSSF and SILSS models share a common "foot print", and can be transferred from one "vehicle-specific" shroud assembly to another for a different vehicle.

Federal Signal announces the availability of four new ILS kits that contain only the shrouds/mounts/brackets/hardware for certain popular police vehicles. By following the installation instructions, and utilizing these kits, an installer can "switch over" the LED boards from an existing ILSSF or SILSS model and move them to a different "vehicle-specific" ILS assembly.

How To Order

Model #	Description	2014 List Price US\$
