

## New Amber options added to our Online Lightbar Configurator

Federal Signal's online Lightbar Configurator has been updated so users can now configure Amber Valor™ and Integrity® lightbars.

Steps to configure a lightbar in the Online Configurator:

- Go to: <http://config.fedsig.com/lightbar/>
- At the main menu, select which lightbar you want and hit "Configure".
- In the column on the left, specify lightbar length, dome colors, mount type, vehicle type and controller.
- Click on each position in the lightbar diagram shown to select your options.
- If you want to modify a position, simply click on the location again and re-select the option.
- As you fill in the lightbar, the system will calculate the list price (in US dollars) for your particular configuration.
- Once you've completed your lightbar, you can select to print, save or email the configuration as a PDF file.

Amber lightbar orders may require special programming and it is important to contact your local Federal Signal sales representative or Amber Customer Care at 800-824-0254 for questions and assistance.
