Build 2.0.0.17 – WEB RELEASE

Public Release Notes:

- Support for file associations (double click file to open in application)
- New expansion module quick start guide, swapped J9 and J12 connectors
- Rename CHMSL and Sense line to CHMSL Cutoff and Sense Line Bypass
- Releases Pathfinder AMP FRWVER 2.1.0.11
- Switching between momentary/toggle no longer clears your configuration
- Bugfix for invisible remote activation command created by tone configuration wizard
- Bugfix for double shutdown command being set
- Bugfix for unplugging the device while flashing a custom tone
- Bugfix for SignalMaster fast/low incorrectly deselecting fast/low power off
- Bugfix for blank/default files: can't select 30 functions on volume button
- Bugfix for front lightbar command being displayed as signalmaster sync

Build 2.0.0.16

Public Release Notes:

- Releases FRWVER 2.1.0.10
- Fixes a bug where the application could fail to extract a configuration created in an older version
- Fixes a bug where there could be an "invisible" backlighting command on the volume button
- Installer size reduced (~100MB to ~20MB)
- Adds support for software fuses on pathfinder and expansion module relays
- Releases expansion module firmware version 2.0.0.1
- Checkbox added to SirenFunctions tab to help with syncing tones across channels.

Build 2.0.0.15

Public Release Notes:

- Expansion module quick start guide added to help menu
- Bug fixed where CAN11 button would have a black background

Build 2.0.0.14

Public Release Notes:

- Feature priority added to configuration report
- Added help icon to BCM disconnect column
- Added expansion module wiring report
- Releases FRWVER 2.1.0.9
- Remove application settings page
- IGN set to priority 1 when created via the shutdown wizard
- Added the ability to turn off Fast/Low power in the SignalMaster tab
- Added the ability to control Fast/Low power independently from the SignalMaster pattern
- Remote PA option removed when a local keypad is selected

Build 2.0.0.13

Public Release Notes:

- Bugfix for missing dependencies after pasting over a button
- (If DIM was dependent on NOT SS3, then pasting SS2 over SS3 would delete DIM's dependency)
- Bugfix for every feature being treated as a "primary" feature
- Renamed "Service brake" to "Brake" for 2019 PIU
- Removed Sync-only patterns from regular SM devices
- Show LocalKeypad/RemoteKeypad in UI
- Remove 6/8 head pattern option in SM tab

Build 2.0.0.12

Public Release Notes:

- Releases AMP firmware version 2.1.0.8
- Releases KEYPAD firmware version 1.0.0.6
- Splits PTT into two inputs (Remote/Local)
- Adds siren/tone configuration wizard
- Adds IGN shutdown wizard
- Adds an "Advanced" mode
- "Use input as a button" added to CAN inputs in advanced mode. (Use AUX buttons or HORN if they are used as a button-style input to our system)
- Warning added when changing input type (TOGGLE/STEP/MOMENTARY)
- Default configuration bugfix: under some scenarios, horn wouldn't step through tones when in HF
- Added 1-2-3-Head, scroll, and title-13 patterns to signal-master tab
- Added dependencies to tree
- Added blank configurations with minimal siren setup for single speaker, dual speaker, and rumbler setups
- Configuration viewer added
- Training guide added
- Cloned buttons moved from properties to context menu
- Siren shutdown moved from IGN to miscellaneous tab
- Keypad LED commands added
- Global backlighting command added
- Configuration report added
- Relay pin-out diagram added
- Ability to copy/paste/delete buttons added (on right click)
- Bug for reloading .JSON with multiple custom commands fixed
- Added support for 2014/2015 PIU
- Added support for 2015 Tahoe
- Added support for 2016 Durango
- Added support for 2019 Taurus
- Added support for 2019 Yukon
- Added support for 2019 Cherokee

Build 2.0.0.11 – WEB RELEASE

Release Notes:

- Fixes PA PID on remote keypads
- Detects bootload mode when upgrading firmware
- Updates default config. (Remove HORN - HF delay OFF, modify HF Override configuration, remove channel-all)
- Sets primary operator to BOOL for STEP/TOGGLE
- Adds BLINK for Local/Remote keypads
