*IP69K Rated with combination of a StreamLine® IP69K top and base modules and retaining ring (SLM-RR). See individual data sheets for more information.

IP69K is the highest standard on the ingress protection (IP) rating scale and designed for applications in which products are regularly exposed to high-pressure and high-temperature washdowns. Common markets for these products include Food and Beverage, Wastewater, Pharmaceutical, Marine, Medical Facilities, and Medical Equipment Manufacturing.

Marketing Materials

- Test reports are available under the fedsig.com resources section and on each product webpage.
- An updated version of the IP69K brochure is available and can be ordered through our [literature center](#).
- Visit the IP69K web page: www.fedsig.com/IP69K-products for additional information

What's Next?

- As a part of an ongoing change, we are adding a "IP69K enclosure" label to applicable referenced products.

Updated and Now Available: Hazardous Brochure

The Hazardous Brochure has been updated to include all of the latest product information and certifications. It can be found on all pertaining web product pages, the [resource section on fedsig.com](#) or the [literature site](#).

Don't hesitate, order your copies today! Feel free to contact your Regional Sales Manager, Inside Sales or Customer Support with any questions.
