Introducing our NEW Product Cross Reference Tool

We are excited to introduce our New Online Product Cross Reference Tool. This sales tool can be accessed from the following sections of our website:

- [Signaling Technical Support](#)
- [Resources](#)

It's simple to use, select the product brand, and then enter their part number. A recommended Federal Signal Product will be listed, with a link to that product page. Currently over 1500 sku's are listed, with new models being added frequently.

For more additional information contact a Federal Signal Regional Sales Manager, our Inside Sales Team or Customer Support.
