

FIRERAY® LED

NEW FEATURES INCLUDING FSJOIN TECHNOLOGY. UPDATED MODEL NUMBERS.

FEATURES

- Models include a steady burn pattern that can be used with Pathfinder® internal flasher or other external flashers and multiplex systems
- Up to (20) single-color and dual-color units can be synchronized to flash simultaneously or alternately
- (13) selectable flash patterns and four flashing modes: full flash, left/right split flash, top/bottom split flash, and criss-cross split flash
- FSJoin™ enables the synchronization and programming of light bars and exterior/interior lights that work in conjunction with the Pathfinder Siren
- Low power feature decreases warning lights to 40% of normal power
- Surface mounts with or without a bezel. Fits the industry standard mounting hole pattern
- Optional Black or Chrome bezels sold separately
- IP67 Rated for protection against dust and water
- Five-year warranty

Federal Signal is pleased to announce the upgrade to our single-color 6 x 4, 7 x 3, and 9 x 7 FireRay® LED models. The new series includes a steady burn pattern that can be used with the Pathfinder® internal flasher or other external flashers and multiplex systems to sync warning lights. The new series of FireRay LED lights also now allows up to (20) units to sync. The new series offers the same wiring, look, and list price as the previous series.

FireRay LED perimeter lights offer a variety of lighting options with a unique look that accommodates multiple mounting applications on fire apparatuses, ambulances, and work trucks.

The current single-color FireRay LED model numbers are being discontinued and replaced with new series.

The recently released dual-color FireRay LED models include these new features and will not have any model number changes.
