

Solaris® ILS single-color interior warning lights to be discontinued

Currently Federal Signal offers two versions of our LED interior warning light systems - **Solaris® ILS** and **SpectraLux™ ILS**. The **Solaris® ILS** style is only available with single-color light head options, while the **SpectraLux™ ILS** currently cannot be configured with only 1-color light heads.

In our continuing effort to improve efficiencies, the **Solaris® ILS** style of LED interior warning lights will be discontinued, and new single-color options will be added to the **SpectraLux™ ILS** style. This will enable customers to configure a **SpectraLux™ ILS** model with identical color configurations as **Solaris® ILS** units that have been ordered previously.

Timing

New orders for the **Solaris® ILS**, models ILSSF and ILSFD, will no longer be accepted after December 31, 2014. The new single-color options for the **SpectraLux™ ILS**, models SILSS and SILSD, will be available to order effective January 1, 2015.

Obsolete Models	Substitute Models	Description of substitute models
ILSSF	SILSS	SpectraLux ILS, 8-head "Split" Front Headlienr models
ILSFD	SILSD	SpectraLux ILS, 10-head Rear Deck models
