

## Federal Signal introduces the new design HotFoot option for Integrity

Federal Signal introduces the new Integrity HotFoot that has an improved design, allows for more customized flexibility, and offers a cost saving compared to the existing HotFoot. The new HotFoot design incorporates multi-color IMPAXX IPX6 lights which provide both flashing and steady burn options. The new design is still built into the base of the lightbar and it allows for the flexibility of having either take downs, alleys, or both.
