Federal Signal Releases New 7x3 QuadraFlare® DOT Model

Federal Signal introduces a new QuadraFlare® DOT model. The new 7x3 QuadraFlare DOT model is designed with a unique reflector technology for superior off-axis warning and is backed by a five-year warranty.

The 7x3 QuadraFlare DOT model is designed to fit in a mounting box and has a unique lens featuring a slight vertical curve to allow the units to “stack” into a DOT box leaving minimal space for moisture or dirt creating a clean look. Brake/Tail/Turn and Back-up light models are also available.

FEATURES

- Enhanced lens design provides outstanding performance to meet various industry lighting specifications
- Break/Turn/Tail and Back-up light models also available
- DOT lens for use in back-end mounting boxes
- LEDs offered in Amber, Blue, Green, Red or White
- Full dual color models available in Amber/Blue, Amber/Green, Amber/White and Red/Amber LEDs
- QL43D- (color) require flasher for operation
- All QL43D models come with weather tight connector
- SAE J595, Class 1 (Amber, Red, Blue and White)
- CAC Title 13 (Amber, Red, Blue)
- S/T/T and back up: FMVSS 108 compliant
- Five-year warranty
