Side Mirror Wedges and Wheel Arch Wedges are Now Available for the 2020 Ford Police Interceptor Utility

New side mirror wedges are now available for the 2020 Ford Police Interceptor Utility. When compared to installing lights to the mirror head, installing lights to the sidearm reduces installation time since the head of the mirror does not need to be disassembled. These wedges are designed to mount the MicroPulse® 6 Ultra light heads to the mirror arm of the vehicle. This location slants downward, making it difficult to mount exterior perimeter lights evenly and forward-facing. The new side mirror wedges are contoured to fit the vehicle's side mirror providing an easier install of side mirror lights while improving the overall look of the side mirrors. Each kit comes with (2) 20-degree wedges to mount MicroPulse 6 Ultra light heads to side mirror of the vehicle.

New wheel arch wedges are contoured to fit the wheel arch of the 2020 Ford Police Interceptor Utility. Each kit comes with (4) wedges to mount MicroPulse 6 Ultra lights to each wheel arch, providing extra side lighting to the vehicle.
