

## New Power Distribution Module available for use with Pathfinder® Sirens

The new Federal Signal Power Distribution Module is now available and works with any Pathfinder® Siren to provide electrical power from one main power source. The Power Distribution Module makes installation faster and easier and increases reliability due to having fewer failure points. In the case of a product losing power, the Power Distribution Module features diagnostic LEDs that will allow the failure point to be quickly located.

The Power Distribution Module includes (4) serial ports to be used with the FS Convergence Network devices, such as light bars or directional warning lights, for easy “plug-n-play” installation. The Power Distribution Module also includes (4) programmable outputs that can be programmed through the Convergence Network Software to provide a high-level of distributed and customizable control capability.

### FEATURES

- Faster, easier install and distributed power/ground
- Eliminates the need for externally mounted fuse holders
- 100 Amp Max load
  - (2) 40 Amp battery constant outputs
  - (6) 30 Amp battery constant outputs
    - (8) Red LED diagnostic indicator lights to the left of each fuse holder will illuminate if a fuse is blown and it has a load
- (4) programmable outputs through the Pathfinder
  - (1) 30 Amp programmable output
  - (3) 20 Amp programmable outputs
    - (4) Green LED indicator lights above the (4) programmable outputs will illuminate when output is active
- (4) FS Convergence Network ports
- Five-year warranty

### SPECIFICATIONS

Input Voltage	12.8VDC
Operating Temperature	-40°C to 80°C (-40°F to 176°F)

#### Physical Specifications

Height	3.0 in (7.6 cm)
Width	4.0 in (10.2 cm)
Length	12.1 in (30.7 cm)

#### Ship Weight

1.8 lbs (0.8 kg)

HOW TO ORDER

Model #	Description	2020 List Price US\$
PFPDM-1	Power Distribution Module, 100 A max load	\$499.00

TIMING

The new Power Distribution Module is available to order today.
