## Allegiant™, Integrity®, Legend®, and Valor® Lightbars are IP65 Rated

The IP (Ingress Protection) rating system is defined in International Standard IEC 605029. IP ratings are used to classify and define ingress protection on electrical devices against solids and water. By defining a rating, the IP system ensures specific levels of coverage when products are faced with varying elements.

The Allegiant™, Integrity®, Legend® and Valor® lightbars are IP65 rated, meaning that they have full protection against dust and are water resistant against low-pressure jets from any direction.

**SOLID PROTECTION**

**IP65**

**WATER PROTECTION**

Dust tight.  
No ingress of dust.

Products with an IP65 rating have full protection against dust and are water resistant against low-pressure jets from any direction.

Protected against low pressure water jets from any directions.  
Limited liquid entry.

**0** Non protected   **6** Dust tight

**0** Non protected   **5** Protected
