

4200S SIGNALMASTER™ AND 4200S SIGNALMASTER™ ARROW

NOW AVAILABLE

Federal Signal is pleased to announce the addition of 4200S SignalMaster™ to our directional warning light product line. The 4200S/8200S SignalMaster is a high-intensity warning system designed to direct traffic approaching from the rear of a stationary vehicle. Different from its 8200S SignalMaster counterpart, the 4200S SignalMaster light head is equipped with (4) LEDs that delivers an impressive optical performance suitable for several vehicle applications.

The 4200S SignalMaster models are available in stick and arrow models. Stick models are available in 31-, 42-, or 51-inch lengths. Arrow models are available in 31- or 51-inch models.

The full-feature 4200S SignalMaster comes programmed with (14) eye-catching flash patterns along with left, right, and center-out directional warning. In addition, the rail design allows users to mount with one of our existing SignalMaster brackets.

The 4200S SignalMaster has an 18-inch whip with water-tight connector that is compatible with either our discrete cable or serial 8-button controller. The discrete cables are available in 15- and 30-foot lengths. The serial 8-button controller includes a 20-ft cable. In addition, the serial 8-button controller offers (2) low-current auxiliary outputs. Optional extension cables are available for both discrete and serial in 15- and 30-foot lengths.

FEATURES

- (4) LEDs per light head
- Stick models available in 6- and 8-head versions; arrow models available in 10- and 16-head versions
- (14) flash patterns
- Aluminum housing with rail design
- Discrete cable or serial controller options
- Low power mode
- 12 Vdc
- Three-year warranty
