

ADDENDUM TO AD26 INSTALLATION AND SERVICE INSTRUCTIONS WIRING DIAGRAMS FOR ALTEC MODELS

Federal Signal Corporation manufactures several different versions of the Atkinson Dynamics Intercom for Altec Industries Incorporated. Although each of these models are functionally the same as the standard single cable master (AD26C-1) and slave (AD26D-1) units, each has its own cable connector(s) and wire colors.

This document illustrates each of the different connectors, the models that use them, and the functions and wire colors associated with each one.
