

CONVERGENCE NETWORK

NEW FEATURES ADDED TO THE CONVERGENCE NETWORK CONFIGURATION SOFTWARE

Version 3.2.0.0 of the Convergence Network Configuration software is available today to download. This new version replaces the current version 3.1.0.33. The following new features have been added to the software:

- Addition of new PA300 keypad and PA300 amplifier
- Introduction of new Pathway™ 100 amplifier
- Inclusion of the option to enable/disable low power mode for locked files with low tones
- Fix for application crashes that occurred when selecting Handheld default configuration
- Fix for application crashes that occurred when battery voltage was set to 0
- Correction of PF200 default configuration
- Increase of battery input support to up to 16 volts
- Fix of Legacy light bar pattern dropdown list UI bug and removal of support for flash patterns 27 or 28
- Fix for Relay Dim checkbox that previously caused crashes
- Correction of PF100 relays supported display
- Fix for 17-Button default PCF
- Introduction of new SIM firmware (version 1.1.0.13)
- Elimination of duplicate outputs in Configuration Viewer from local PA and PA
- Fix for Reliant™ Board Mapping
- Allow User to select a front FSJoin™ with a rear CN SignalMaster™
