NEW MODELS ADDED TO THE RUMBLER SERIES

RUMBLER SOLO

RUMBLER COMPACT

FEATURES

- Rumbler® low-frequency speakers deliver up to 10 dB more sound pressure inside civilian vehicles near the emergency vehicle—getting attention and clearing traffic more effectively than a standard siren tone
- Highly effective in dense urban environments with heavy vehicle traffic
- Rumbler low-frequency speakers work in conjunction with Federal Signal sirens that feature integrated Rumbler Traffic Clearing capability
- Interacts with most 100/200 W emergency vehicle siren amplifiers
- Enabled via any emergency vehicle steering wheel horn ring
- Eight-second safety timer provides automatic tone shutdown
- Rumbler low-frequency speakers are also available with Rumbler amplifier to work with other Federal Signal sirens
- Vehicle-specific mounting brackets available, sold separately
- Three-year warranty

The Rumbler® low-frequency speakers include two new models. The Rumbler Solo is a single speaker, allowing for easier and faster installation. The Compact Rumbler is a pair of speakers, allowing for additional mounting locations.

Rumbler low-frequency speakers work in conjunction with Federal Signal sirens that feature integrated Rumbler Traffic Clearing capability. This capability allows the sirens to produce a Rumbler tone without the need for a separate externally mounted amplifier.

Rumbler low-frequency speakers are also available with a Rumbler amplifier, providing the Rumbler feature to other Federal Signal sirens. Rumbler works simultaneously with the primary siren tone to penetrate solid materials, allowing vehicle operators and nearby pedestrians to feel the sound waves. The Rumbler is particularly effective for Police and Fire/EMS applications when used in dense urban environments with heavy vehicle and pedestrian traffic.

Rumbler senses the primary siren tone signal and reduces the signal's frequency by 75%. It then amplifies the sound through the Rumbler low-frequency speakers. The timer allows the tone to sound for eight seconds, provides a highly effective warning, and automatically shuts off. The Rumbler is particularly effective when used in dense urban environments with heavy vehicle and pedestrian traffic.

RUMBLER.
2X LOUDER WHERE IT MATTERS
Rumbler® low frequencies deliver up to 10dB more sound pressure inside civilian vehicles near your emergency vehicle—getting attention and clearing traffic more effectively than a standard siren tone.
Sound pressure varies based on vehicle type and distance.

Low frequency tones work simultaneously with primary siren—penetrating nearby vehicles.

Particularly effective for Police and Fire/EMS applications in dense urban environments with heavy vehicle traffic.
