- Five-year warranty

Federal Signal is pleased to announce the release of our new 416900 Series Corner LED single-color and tri-color models. The new tri-color models can operate as single-, dual-, or tri-color light.

The 416900 Series Corner LEDs are sealed to prevent water ingress. To accommodate multiple mounting applications, light heads come with a bezel that conceals the mounting hardware for an appealing look for surface mounting and a gasket that allows for a head lamp installation. 416918-RBW-SMK comes with a smoked lens for a discrete appearance. The dark tinted polycarbonate lens makes this model the optimal choice for undercover applications.

The 416900 Series Corner LEDs are FSJoin™ compatible. FSJoin is a programming compatibility feature of Federal Signal's light bars and exterior/interior warning lights that work in conjunction with a Convergence Network siren or controller. When using FS products, the Convergence Network siren/light controller controls all of the vehicles warning light flash patterns, dimming features and light head syncing/alternating patterns.
