

New NFPA Configurator is Now Available on FedSig.com

Federal Signal is excited to announce the new NFPA Configurator. This new platform allows you to configure a NFPA compliant warning light package for your large or small apparatus. Select from popular Federal Signal light bars, mini-light bars, beacons, and perimeter lights to meet each zone requirement. Once zone selections are complete, additional products such as sirens, speakers, and directional warning lights can be added under the "Options" section. A convenient PDF "Certificate of Compliance" along with an "Order Form" are provided once all selections are complete that can easily be printed or saved to your computer.

NFPA Configurator Home Screen

HOW TO USE THE NFPA CONFIGURATOR

- Click to visit <https://nfpa.config.fedsig.com>
- Select your vehicle, Large Apparatus or Small Apparatus
- Click on the different zones at the top of the screen to move from zone to zone
- Select your product for each zone
- Select additional products under "Options" section, if desired
- Once a selection has been made in each zone, click "Create Report"
- Enter your information and department information. Once finished, click "submit"
- Print or save to your computer the PDF "Certificate of Compliance" and "Order Form"

Certificate of Compliance Example

NFPA 1901 CERTIFICATE OF COMPLIANCE
When mounted in accordance with the standard, the systems offered above are certified by Federal Signal Corporation to meet the lighting requirements of the "NFPA 1901 Standard for Automotive Fire Apparatus, 2018 edition" as described in Chapter 13, titled "Low Voltage Electrical Systems and Warning Devices". This certification is based on tests performed by Federal Signal Corporation which demonstrate that these systems, when functioning properly, shall meet or exceed the minimum optical power requirements of the standard. This document, when properly completed, serves as your certification from Federal Signal Corporation.
