

WORK TRUCK CONFIGURATOR

WORK TRUCK CONFIGURATOR NOW AVAILABLE ON FEDSIG.COM

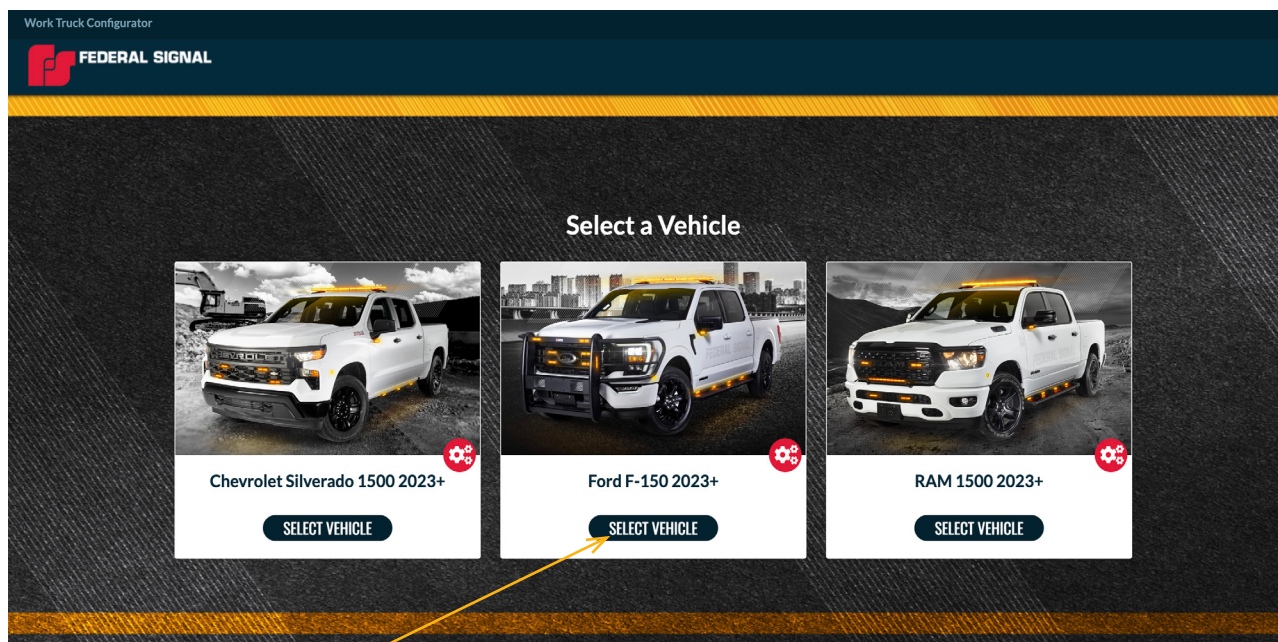

Federal Signal is pleased to announce our new Work Truck Configurator. This platform allows users to configure a work truck warning light package from a selection of the most popular truck models.

Select from popular Federal Signal light bars, beacons, perimeter lights, interior lights, and other accessories. Vehicle-specific brackets are bundled with their respective products, ensuring proper item selection.

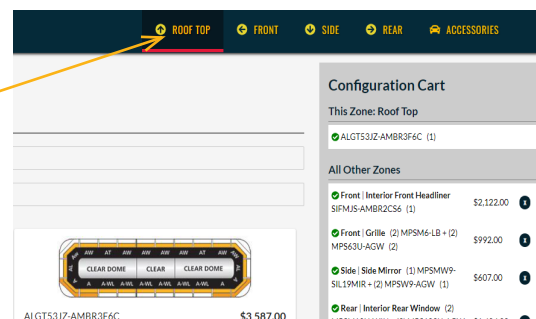

Federal Signal products are organized into specific vehicle zones, allowing users to easily work on one zone at a time. When all selections are complete, a PDF with a detailed product list is generated allowing you to print or save it to your computer along with an order form.

How to get started:

1. Select Work Truck Configurator from the Product Tools in our [Resource Library](#).

2. Select your vehicle.
3. Begin configuring your work truck by clicking on different vehicle zones at the top of the screen to select your Federal Signal products.

- Click "Select" to add different products to your cart – users then have the ability to add a note or increase the desired quantity.
- Once you have completed the product selections for each zone, click the "Create Report" button.
- Enter the contact information in the quote form pop-up window, then click "Submit."
