

NEW SECUREFIT™ CHMSL PLATFORM SERIES

NOW AVAILABLE

FEATURES

- Drill-less mounting platform using the CHMSL (Center High-Mounted Stop Lamp)
- Level platform for mounting beacons and mini-light bars
- Powder-coated aluminum to prevent corrosion
- Three-year warranty

Federal Signal is pleased to announce the release of our new SecureFit™ CHMSL Platform Series. The SecureFit CHMSL Platform Series is designed for drill-less mounting using the CHMSL (Center High-Mounted Stop Lamp). It discreetly mounts behind the factory 3rd brake light, securely clamping to the body opening; no cutting or drilling required.

The SecureFit CHMSL Platform Series supports various warning light options on a level mounting surface, such as beacons and mini-light bars, ensuring you can improve your vehicle's visibility and safety without any harm to it.

Crafted from durable powder-coated aluminum, robust construction prevents corrosion and maintains the product's aesthetics over time, ensuring long-lasting performance and a sleek appearance.
