

FT SERIES

NEW FIELD INSTALLABLE DOOR LOCK FOR FT SERIES

Federal Signal is excited to announce the availability of a new accessory for the FT Series Telephones. Model P006461 is a durable door lock assembly designed to enhance the physical security of FT enclosures.

The P006461 lock kit offers a simple and effective way to restrict access to the interior of the telephone housing, making it an ideal option for installations in public spaces, industrial sites, and other high-risk environments.

This accessory is intended for field installation, allowing flexibility for retrofit projects or on-site customization.

Key Benefits:

- Enhances enclosure security
- Compatible with all FT Series Telephone models
- Designed for simple, on-site installation
- Ideal for applications requiring restricted access

By adding this lock assembly, users can better protect internal components and prevent unauthorized access, ensuring the reliability and integrity of critical communications systems.
