

ALLEGiant® MAX SERIAL

INTRODUCING THE ALLEGiant® MAX SERIAL LIGHT BAR

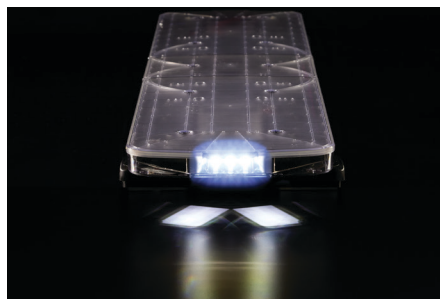

FEATURES

- Low-profile, linear light bar
- Available in 45", 53", 61", 70", and 80" lengths
- Amber, Blue, Green, Red, and White
- Single-, dual-, and tri-color capability
- Built-in SignalMaster™ directional warning
- Front flood, rear flood, left flood, right flood, takedowns, alley lights, work lights, external power S/T/T, OBDII-integrated S/T/T, bed light (except 45"), and alley ground lights are available
- Integrated sync
- Rollback safety reflectors
- Low-power mode
- (30) flash patterns
- 12 Vdc
- Easy service while installed on the roof top
- Five-year warranty

The Allegiant® Max is available with tri-color capability that offers the flexibility to instantly switch between multiple LED colors for improved functionality – whether you're responding to an emergency or working in challenging conditions. Single-, dual-, and tri-color configurations are available in any combination of Amber, Blue, Green, Red, and White. Popular configurations are set up as stock models for your convenience; otherwise, custom configurations can be created using our online configurator.

The integrated sync feature of the Allegiant Max is a game-changer. By eliminating the need for a separate PFSYNC-1 module, this design simplifies the installation process and reduces costs. Without the need for a separate module, there is less room for connection failures, which leads to a more reliable system.

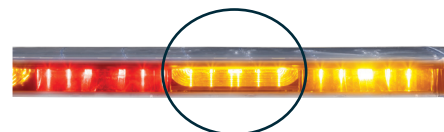

The Allegiant Max continues to offer Federal Signal's exclusive bed light option, which shines a White work light down from the light bar into the bed of the truck. For even more safety, the Allegiant Max offers an alley ground light option to increase visibility as you enter and exit your vehicle.

APPROVALS

- SAE J595 Class 1
- SAE J845 Class 1
- CCR Title 13
- NFPA 1900
- IP65

With the addition of rollback safety reflectors, the Allegiant Max enhances rear warning during tow truck operations. These reflectors are strategically designed to reduce collision risks by providing enhanced warning to approaching vehicles.
