

MICROPULSE® ULTRA

NOW AVAILABLE WITH WATERPROOF CONNECTORS

Federal Signal is excited to announce that the popular MicroPulse® Ultra will now include a waterproof connector, designed to simplify installation and ensure greater reliability in harsh conditions. The waterproof connector provides a secure and sealed connection, effectively preventing damage and significantly reducing the risk of failure. Key benefits include enhanced environmental protection, improved electrical reliability, resistance to vibration, and easier maintenance and replacement.

As of September 29, 2025 all MPS3U, MPS6U, and MPS12U models will be built with the waterproof connector as a standard feature. If you do not want to take advantage of the waterproof connector, it can simply be cutoff and wired according to the product's installation manual.

To increase installation efficiency, we have also created mating connector kits and extension harnesses.

HOW TO ORDER

MODEL	DESCRIPTION	2025 LIST PRICE US\$
WPCABLE-8	8-ft extension cable for (1) MicroPulse Ultra with waterproof connector	\$50.00

WPCONKIT-200	Male mating connectors, 200-piece bulk pack	475.00

TIMING

As of September 29, 2025, every MicroPulse Ultra unit built will feature the waterproof connector. This feature is being added as part of an ongoing change. Models built prior to September 29 without the connector will continue to ship until the existing stock runs out.

New kits for the mating connector and extension harnesses are now available to order.
