

SPEAKER ROTATIONAL MOUNTING KIT SEL-KIT-RS

NOW AVAILABLE

Federal Signal is pleased to announce the availability of the SEL-KIT-RS, a rotational mounting kit designed to enhance the versatility of our SelecTone®, AudioMaster®, and hazardous location amplified speakers.

The SEL-KIT-RS enables directional aiming of speakers by angling the speaker off the mounting surface, allowing for more controlled sound projection and improved area coverage. This mounting flexibility is ideal for indoor and outdoor industrial applications where precise sound direction is critical for performance and safety.

Compatible With the Following Models:

- AM300 and AM302 AudioMaster Public Address Speaker
- 300GC SelecTone Amplified Speaker
- 300GCX SelecTone Hazardous Location Amplified Speaker
- 300 SelecTone Amplified Speaker
- 302GC SelecTone 30W Amplified Speaker
- 302GCX SelecTone 30W Hazardous Location Amplified Speaker
- 304GC (15W) and 314GC (30W) SelecTone Amplified Speaker
- 304GCX (15W) and 314GCX (30W) SelecTone Hazardous Location Amplified Speaker
- ASHH and ASUH Hazardous Location Amplified Speakers
- ASHP and ASUP Amplified Speakers
- SST3GCX-MV Hazardous Location Remotely Selectable Electronic Siren
- AM15 AudioMaster Public Address 15 Watt Speaker
- AM15XD2 AudioMaster Public Address Hazardous Location Speaker

The kit's durable stainless steel construction ensures reliable long-term performance in harsh environments. Installation is straightforward and requires only basic tools.
