

FLOOD WARNING APPLICATION NOTE

NOW AVAILABLE

The flooding disasters over the last two years have led to many questions about whether Federal Signal has any marketing material around flood warning solutions. The marketing team received feedback from our different sales teams and put together a document that shows the capabilities of Federal Signal and the advantages of working with our team on a flood warning solution. The sheet will be on www.fedsig.com under the Product Literature button on each product page in Sirens & Speaker and Software category. It will also be available for download on Documoto. Thank you to everyone that collaborated on this application note.
