- 5-Year warranty

APPROVALS

- SAE J595, Class 1
- SAE J845, Class 1
- CCR Title 13
- IP67

FS TECHNOLOGIES

Federal Signal is pleased to announce the release of the new DynaFlare™ perimeter light!

DynaFlare™ is a low profile, tri-color, programmable perimeter light. DynaFlare is available in five-foot and six-foot lengths. Each twelve-inch light head contains four Individually programmable positions with high-power LEDs. Each Light position may be individually programmed through our FS Convergence network software.

DynaFlare is also available with a smoked lens. The dark tinted polycarbonate lens makes this model the optimal choice for undercover applications.

Built to stand up to harsh conditions

DynaFlare is fully sealed with optically clear potting material to protect against harsh conditions. The potting material provides a barrier against moisture, condensation, dust, chemicals, shock, and vibration. The potting material is encapsulated in a polycarbonate, water resistant housing. For additional protection, the extrusion is aluminum to offer stability in the harsh conditions.

The DynaFlare perimeter light is built with a waterproof connector to provide a simple installation. As well as a secure and sealed connection, effectively preventing damage and significantly reducing the risk of failure.

FSJoin® Compatible

DynaFlare models are FSJoin™ compatible. FSJoin is a programming compatibility feature of Federal Signal's light bars and exterior/ interior warning lights that work in conjunction with a Convergence Network siren or controller. When using FSJoin products, the Convergence Network siren/light controller controls all of the vehicle's warning light flash patterns, dimming feature, and light head syncing/alternating patterns.
