

KENWOOD UHF RADIO

5800 SERIES UHF RADIO

Kenwood recently informed us they are pushing out delivery dates for the UHF 1800 series. We expect this issue will be resolved in 3 to 6 months. In the meantime, Federal Signal is creating new models using the 5800 series UHF radio. Please refer to the table below. The new models will have a \$300 markup compared to the current models reflecting the additional cost of the 5800 series. Please start quoting these new **-FP** models now. Once the 1800 series is back in stock, we will advise the field and quotes can be adjusted accordingly.
