

# COMMANDER® ON-PREMISES SIREN CONTROL AND MONITORING SYSTEM

## NEW RELEASE OF COMMANDER® ON-PREMISES AND COMMANDER® CLIENT SOFTWARE

Version 16.2.0.7 of Commander® On-Premises Siren Control and Monitoring System is now available. This new version replaces Version 16.1.0.34. The following new features and enhancements have been added to the software.

### New Features

- Display printer selection dialog when printing reports.
- Add function priority feature
- Priority - Add "UV Function Priority" checkbox to System Setup screen to enable/ disable the priority feature.
- Priority is only applicable for UV and UVRI-B types.
- The Program command must be sent to the RTU to change the priority configuration.
- Priority controls will be visible on the program screen only if the RTU type and version supports priority (UV+ 6.2.0.1 or greater, UVRI-B v6.3.0.2 or greater).

### Improvements

- Copy from another RTU - Do not overwrite IP addresses – fixed.
- Copy from another RTU - RTU Config PA VOIP: Relays 3 and 4 were not being copied – fixed.

### TIMING

Commander and Commander Client software can be downloaded today at <https://www.fedsig.com/warning-mass-notification-systems/tech-support/software-downloads>
