

MICROSOFT ENTRA SINGLE SIGN-ON FOR COMMANDERONE®

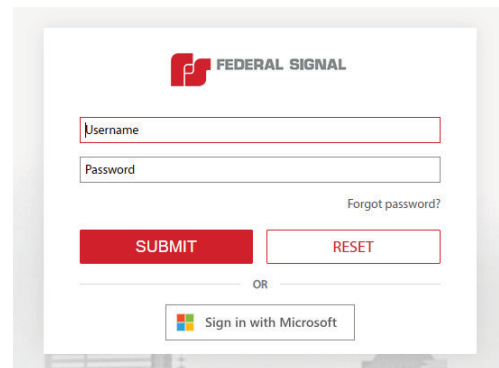

FOR AN EASIER, MORE SECURE SIGN-ON

Federal Signal is excited to introduce a powerful new module for CommanderOne® that enhances security and simplifies user access: **Microsoft Entra Single Sign-On (SSO)** integration.

What's New?

With this update, customers can now log in to CommanderOne using their **Microsoft Entra** ID credentials. This means:

- **Seamless Access:** No more juggling multiple usernames and passwords.
- **Enhanced Security:** Leverage Microsoft's enterprise-grade identity protection. Customers can grant and revoke access and enforce two-factor authentication in accordance with their internal policies.
- **Improved Productivity:** Faster login experience for your teams.

Why It Matters

Single Sign-On reduces friction for users and strengthens your organization's security posture by centralizing authentication. By integrating with Microsoft Entra, CommanderOne aligns with modern identity management best practices.

How to Get It

Customers can purchase module **COMMANDER1-SSO**. Our expert technicians will work directly with your IT staff to configure and enable this module, ensuring smooth and secure deployment.

When Is It Available?

COMMANDER1-SSO will be added to CommanderOne the week of December 29 and customers can begin contacting their local sales representatives for further information.

CommanderOne is a registered trademark of Federal Signal Corporation.
