

QUADRAFLARE® SIGNALMASTER™

NOW AVAILABLE

Federal Signal is pleased to release the latest innovation in directional warning with the QuadraFlare® SignalMaster™, providing left, right, and center-out directional signals to rear-facing traffic. QuadraFlare LED light heads illuminate individually in a sequential sweeping motion until all lamps are illuminated. In addition, an alternating flash pattern produces a warning signal for use when a directional signal may not be appropriate. Requires 330104-SB or 331105-SB controller sold separately.
